

## Important note about font licensing:

Monotype Imaging has provided “*sample*” fonts for use inside the Scaleform GfX product for demonstration and evaluation only. The fonts provided by Monotype Imaging are not licensed for use outside that purpose and specifically not for use in any commercial product.

You need to obtain a distribution (or OEM) license from Monotype Imaging in order to use any of our copyrighted and trademarked fonts

To license any of our fonts for use within any application environment such as a game, please send an email request to:

**[ISVFontLicensing@monotypeimaging.com](mailto:ISVFontLicensing@monotypeimaging.com)**

Monotype Imaging's selection of more than 10,000 fonts helps application developers meet style, language support and memory requirements. Embed fonts to deliver consistent text and reduce development cycles for games and applications running on multiple platforms.

## **HIGH-QUALITY FONTS FOR GAMING DEVELOPERS**

Monotype Imaging offers a wide offering of fonts for games. The selection we included within the Scaleform GFx product set is a subset of our collection specifically created for the needs of game developers and manufacturers and includes selections for setting mood, delivering instructions, and expanding language support.

Our Latin-based fonts are grouped into two categories: viewer interface fonts and theme-based fonts. Our viewer interface designs are ideal for displaying text and have been optimized to ensure a high level of readability, even on low-resolution displays. Theme-based fonts convey themes and moods such as "action" and "futuristic."

***Have something specific in mind?*** Contact us:

**[ISVFontLicensing@monotypeimaging.com](mailto:ISVFontLicensing@monotypeimaging.com)**

We offer flexible, affordable licensing options for **world-wide languages** to address various types of font usage and quantities of distribution.
